

"The Internet of Things (IoT) refers to the connectivity of physical objects, equipped with sensors and actuators, to the Internet via data communication technology, enabling interaction with and/or among these objects."

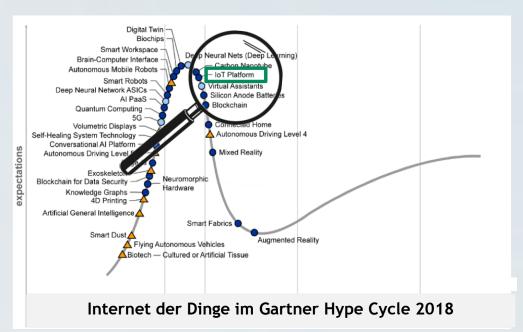

MOTIVATION

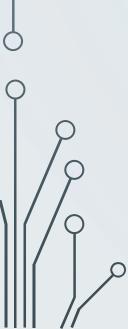

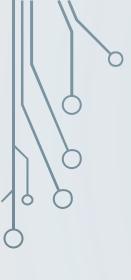

PROJECT QUESTION?

Which Smart Products are especially successfull? Which kind of Smart Product is my Product?

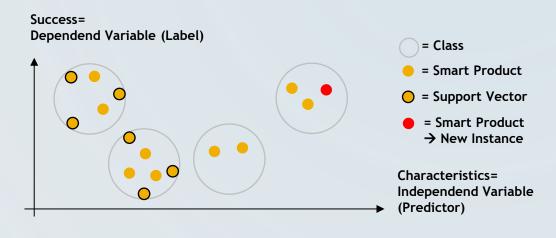

Prediction with a Machine Learning Approach

PREDICTION BASED ON SUPPORT VECTOR MACHINE

Explanation

- SVM trains on the basis of characteristics and market success of the smart products
- **Depending** on the **characteristics** of the smart product, it will have a **certain success**
- Success results from Google search queries
- Apply SVM to an entirely new object/instance

WHAT DO WE NEED? THE PREWORK!

Taxonomy

General description of Smart Products.

	Dimension			Charac	teristics				
l 。	Ecosystem Integration	No	ne	Proprieta	ary		Open		
Service	Value Proposition		Thing-cer	ntric		Service-cer	ntric		
N N	Offline Functionality		None			Limited			
Data	Data Usage	Transactional		Analytic (basic)			nalytical xtended)		
	Data Source	Thing State Thin		g Context Th		Usage	Cloud		
ion	Interaction Partner	Use	r(s)	Business((es)	Thing(s)			
Interaction	Interaction Multiplicity		One-to-c	one		One-to-m	any		
Int	Interaction Direction		Unidirecti	onal		Bi-directional			
50	Autonomy	No	ne	Self-Contro	olled	Self-Learning			
Thing	Acting Capabilities		Own				Intermediary		
	Sensing Capabilities		Lean		Rich				

Data set

About 200 classified Smart Products, related success and cluster affiliation.

CONCLUSION

Learnings

- Improvement of quality measures necessary for the success of Smart Things
- Possible reasons for insufficient results:
 - Too many features (i.e. characteristics)
 - Extension of the data set by further Smart Things to achieve a representative sample
 - Devices with similar characteristics have different degrees of success
- Quality measures for cluster allocation achieve good results. Thus, assignment based on user input is possible
- Evaluation in comparison with other methods (e.g. neural networks)
